INDUSTRY

Development and production of functional coatings

EMPLOYEES

45

BOYUM SOLUTIONS

Beas Manufacturing

FEATURED PARTNER

Cerro EDV-Systemhaus GmbH

GXC Coatings was founded in 2000 and offers functional coatings for the automotive industry, self-driving and electric vehicles, optical sensors, renewable energies, white goods and medical technology. The innovative and growing high-tech company develops and manufactures functional coatings based on chemical nanotechnology and applies them on a large scale to plastic, glass and metal surfaces, giving sophisticated surfaces new and durable properties such as scratch resistance, anti-fogging and dirt repellency

Customer Challenges

- Excel no longer sufficient
- solid basis needed for both auditor and certification
- Simplify data and make it accessible to everyone
- Avoid data entry errors
- Be able to better map production process planning

Solution

- After a comparison with other providers, GXC Coatings focused on SAP Business One. The crucial factor for the decision was the possibility to extent with the Beas Manufacturing add-on.

Results

- The terminal solution from Beas has been very successful amongst the staff and has increased acceptance
- the operation is much easier
- the booking process is now better than before
- control steps are always possible from goods receipt to goods issue, which minimizes errors

"WE CAN SAY THAT OUR PARTNER PROVIDES US WITH VERY GOOD SUPPORT AND THAT EVERYTHING IS JUST GOING WELL!"

Michael Schmidt, Purchasing /Procurement, GXC Coatings GmbH
