FEATURED PARTNER

teamwork Switzerland

Founded in 1946 in Geneva, the GEPY company is recognized as a world leader in the field of turning points and quills. The unique and innovative taper roller technology incorporated in all products enables our customers to achieve perfect precision and extremely reliable performance. Expert for the most complex applications, GEPY has always developed sophisticated products adapted to the requirements of its customers around the world (Europe, Asia, America).

Customer Challenges

- We didn't have one IT system that could process information about customers and our production at the same time.
- Time and energy was lost on long processes - we missed standardization.

Solution

- Complete manufacturing solution fully integrated to SAP Business one with continuous future enhancement

Results

- We were able to concentrate important data in one program, which helps simplifying processes and analyzing important business data.
- We now have a streamlines sales process (quote, order, invoice)
- Tools for analyzing relevant data (on customers, sales, stock, and more)

"WE NOW HAVE STANDARDIZED AND SIMPLIFIED OUR PRODUCTION PROCESSES, ARE NOW RUNNING MORE EFFICIENTLY"

Pierre Garcia / Director
