PARTNER

Heinsohn Business Technology

Since 2007 FiberGlass Colombia S.A. is part of the French Saint-Gobain group, which is a world leader in habitat issues and in the construction industry. The company designs, produces and distributes materials for construction, providing innovative solutions to meet the growing demand in emerging economies, energy efficiency and environmental protection.

Challenges

- Optimize and automate inventory management processes in the company's warehouses

Solution

- Production, dispatch and warehousing users applying the software to operations
- Optimizing the use of online information, controlling the movements, applying business rules according to the scope of the application

Results

- Huge impact on the business as processes were positively affected, thanks to improved inventory management
- The company found the partner very helpful in the process, pointing out all the advantages and functionalities that suited their business

"HUGE IMPACT ON THE BUSINESS AS PROCESSES WERE POSITIVELY AFFECTED, THANKS TO IMPROVED INVENTORY MANAGEMENT."

Juan Alexander Ortiz, Fiberglass Colombia S.A.
