Galutti Automotive improved its production, logistics and quality processes by 60% with Beas Manufacturing

Galutti Automotive operates in the metallurgical industry since 1988 as a supplier for automotive companies, specializing in the manufacture of parts that contain wires in their configuration. Among the main services provided by Galutti Automotive, they have the manufacture of parts for automotive lines for car and motorcycle assemblers, in addition to working with the entire chain of home appliances (white line), as well as heavy components for the yellow line, such as tractors and buses.

Customer Challenges

- The need to control and manage production
- The need to control stock
- Lack of process control and information on quantities was resulting in the production of excess or, at other times, not enough stock available
- Production and logistic employees were the most affected by these challenges

Solution

- Using Beas Manufacturing with SAP Business One, it was the 3rd implementation the company decided on but the best one fitting their needs

Results

- Production and stock control
- Process traceability
- Production, logistics and quality processes improved by 60% and there is room to do even more with Beas
- Better interface and overview
- Quality planning

"BEAS MANUFACTURING SHOWS US OUR OWN PROCESSES BETTER, MAKING THEM CLEARER ACROSS ALL DEPARTMENTS"

Ricardo Ramos – Engineering Manager
