Produmex Scan

FEATURED PARTNER

Primagran **has revolutionized** their warehouse circulation with Produmex Scan

Primagran is a manufacturer of granite sinks of the highest quality - the brand stands for design, modernity and durability. As a manufacturer, Primagran makes sure that its products are made of high-quality materials, keep up with the latest trends and become functional fixtures in any kitchen. The brand's success is based on careful production, high-quality components, unique recipes and technological know-how. Produmex Scan was chosen to implement barcodes in the warehouse and use them for efficient and fast generation of documents, e.g. MM, by production staff.

Customer Challenges

- The SAP Business One software itself did not allow for barcode scanning and warehouse flow automation. The process of generating MM documents was lengthy and the registration of goods was done manually. In order to locate the product in the warehouse, the assistance of a person with access to SAP Business One was needed each time.

Solution

- We only considered Produmex Scan, which is compatible with SAP Business One and reasonably priced. This software was recommended by SUPREMIS, our main supplier of solutions from the SAP Business One family.
- It was also important to us that there are also other companies in Poland that can support this solution, that is why we decided to use Produmex Scan.

Results

- significant acceleration of the generation of MM documents using Produmex Scan - previously the process was long,
- thanks to Produmex Scan, employees know exactly where the goods are located - before that, you had to look for or ask someone with SAP access,
- goods registration (receipt / release) is carried out electronically, not manually.

"WHAT I APPRECIATE MOST IS THE CUSTOMIZATION. PRODUMEX SCAN WORKS WITH ZEBRA COLLECTORS THAT HAVE SMALL SCREENS. PRODUMEX SCAN HAS A MOBILE VERSION, WHICH SAP BUSINESS ONE DOES NOT HAVE. THANKS TO PRODUMEX SCAN, WE HAVE A COMPLETE OVERVIEW OF WHERE EACH OF OUR PRODUCTS IS LOCATED."

Tomasz Sznajder | Chairman of the board, Primagran Sp. z o.o.
