Customer's Challenges

- Need for a growth-oriented ERP with a scalable range of administrative and operational functionalities.

- Desire to optimize warehouse processes.

- Aim to increase data transparency with real-time data for better operations oversight.

Solution

- Robust, scalable data management platform capable of ensuring future integration of WMS, barcoding systems, and online ordering for customers.

- B1UP enables the company to customize and automate a wide range of processes from providing sales quotations to product shipping and delivery.

Results

- Optimized inventory oversight generating time savings and ease of use for the company and customers.

- Data transparency and more efficient data flows among management, staff, and customers.

- Increased overall efficiency with simplified, one-click reporting.

"Highly flexible and responsive solution. Easy to use, Partner deemed creative and proactive."
