Servicios Microinformatica SA

Teresa Carles Holding have been innovating in the matter of healthy food since 1979. Now Teresa Carles Healthy Foods has more than 230 employees and a R&D team driven by passion and the wish to make their dream come true: improve people's quality of life through healthy food, knowledge and technology. They chose Prodimex Scan because it's seamlessly integrated with SAP Business One.

Customer's Challenges

- They needed a solution capable of consolidating the growth of recent years and laying the foundations to fulfill the ambitious expansion plan for the next ones.
- All inventory control and logistics circuits were done manually.
- Full traceability is especially important in the food industry, and the detection of any incident to resolve must be immediate.

Solution

- Carry out all inventory and logistics transactions with scanners, ensuring full traceability from end to end.
- Perform all inventory operations with barcode scanners.

Results

- All logistics personnel benefit from the use of Prodimex Scan; all movement registration was done and controlled manually before the implementation.
- Significant improvement in inventory control and increased productivity in all logistics operations.

"NOW ALL INVENTORY AND LOGISTICS TRANSACTIONS ARE CARRIED OUT WITH SCANNERS, ENSURING FULL TRACEABILITY FROM END TO END."

Àlex Mercé, Manufacturing Manager Directr
