

Ultrasonic growth via data consolidation with **Beas Manufacturing**

Company: **Rinco Ultrasonics**
 Website: www.rincoultrasonics.com
 Industry: **Industrial Machinery & Components**
 Employees: **130+**
 Partner: **ANG GmbH**
 Solutions: **Beas Manufacturing**

As a leading manufacturer of ultrasonic welding and cutting technology with 40 years on the market and 15 global subsidiaries, with operations in over 40 countries, Switzerland-based RINCO ULTRASONICS has always strived to develop new and better products with a consistently high level of quality. With Beas Manufacturing, Rinco Ultrasonics has achieved a consolidated data platform with faster processes, more accurate, real-time data for company-wide oversight, streamlined internal workflow and communications, a state-of-the-art delivery system, thus ensuring Rinco Ultrasonic's leading position well into the 21st century.

“

We needed a complete system to centralize data from each subsidiary and SAP Business One was the best system to attain such global organization.

”

*Serge Patania,
CEO*

Challenges

- Seeking an integrated, centralized system to better organize global subsidiaries' data.
- Aspiration to improve internal communication flows since they were inefficient and ineffective.
- Desire to further expand an already successful business and future-proof data systems which lacked organization.

Solution

- Integrated, scalable data management platform with real-time data, analytics and user-friendly dashboards for comprehensive, company-wide oversight.
- Beas Manufacturing allows for better materials and resource forecasting and planning.
- Partner rapidly pinpointed processes susceptible to improvement and provided highly proficient support.

Results

- Faster overall processes and greater efficiency which resulted in greater data transparency and accuracy for better decision-making leading to streamlined delivery system resulting in greater customer satisfaction.
- Better internal organization for production related activities.
- Enhanced communications and workflow among headquarters and subsidiaries
