SAP Business One and Beas Manufacturing - Excellent price-performance ratio and easy to use

VAUTID is one of the leading companies for metal-based wear protection and is represented in more than 40 countries worldwide. As a system solution specialist, VAUTID supports operators and manufacturers in the comprehensive minimization of wear processes, which increases the service life of steel parts in the wear area and creates the basis for sustainable operation. However, the existing ERP system was so extensive that it far exceeded VAUTID's requirements and was therefore very complex and cost-intensive for updates and maintenance.

Challenges

- An ERP system is needed that is aligned with the company's requirements
- More efficient processes, due to a lean ERP
- Cost savings

Solution

- Ease of use of SAP Business One and Beas Manufacturing
- Independent maintenance and administration of the ERP system
- Price-performance ratio

Results

- Connection of branches and subsidiaries in Germany and abroad
- Extensive report management
- Compliance with country-specific requirements, e.g. for financial accounting
- Integrity with third-party systems, such as the company-wide financial planning tool

"IN ADDITION TO THE EXCELLENT PRICE/PERFORMANCE RATIO, WE WERE ALSO IMPRESSED BY THE EASE OF USE. WE CAN NOW MAINTAIN MANY THINGS WHICH MAKES US MUCH MORE FLEXIBLE AND EFFICIENT."

Oliver Hoß, Leiter IT, VAUTID GmbH
